## Micro Laboratory Technicians

Our client requires two experienced Micro Laboratory Technicians to work in their Quality Control Laboratory. Based in Melbourne's Outer Eastern Suburbs, the position offers a solid 'team environment' and an attractive remuneration package.

This challenging position will allow you the opportunity to exercise your organisational and problem solving skills whilst being an integral part of an enthusiastic team. We are seeking a self-motivated candidate with highly developed communication skills. Standard hours are 36 hours/week but a flexible attitude towards shift work and overtime (where required) would be highly regarded.

The successful candidate will possess the following:

- Preferably experience in the pharmaceutical industry (Food/Dairy/Env. as alternate sources)
- Familiar with cGMP requirements, if possible TGA (possibly an understanding of BP, EP and USP). Good ISO9000 or NATA background would be acceptable.
- Experience in documentation SOP and Method writing.
- Familiar with TAMC testing, PS, Sal, E.Coli and Staph testing.
- Some experience with environmental monitoring - particularly in a clean room environment. i.e. water testing, swabbing, air quality testing.

Experience in Sterility testing or Endotoxin testing would be a great advantage.

For a bright future with this well established pharmaceutical company contact [Andy Campbell](mailto:Andy.Campbell).
